

Standard Elevator Sill line in Bronze, Brass & Nickel Silver

Generic profiles for cab/car, landing, hatch, and hoistway sills

Built for elevator entrances and modernization projects

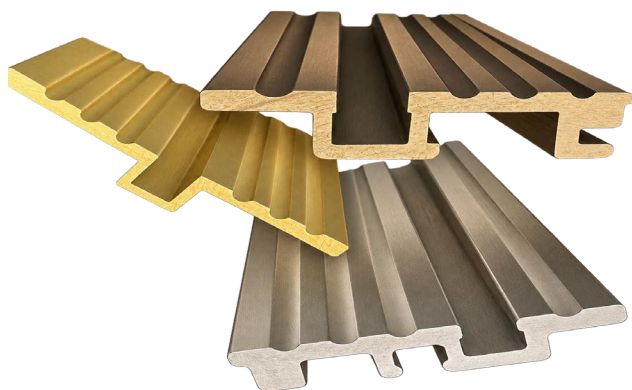

DEECO Metals supplies generic and custom extruded bronze, brass & nickel silver elevator sills for cabs, cars, hatches, landings, and hoistways. Standard generic sill profiles support standard elevator sill requirements. Custom configuration shapes available per customer drawings when required.

Advantages

- Extruded profiles help reduce machining time from solid bar stock or castings
- Available for single speed and double speed cab and hatch applications along with 4" extension
- Standard 8 ft lengths with additional lengths on request
- Cutting services, sanding, punched trash holes machined and threaded countersink holes on request

Metal Alloy & Length

Brass, Bronze & Nickel Silver.
DEECO can supply 7 ft, 8ft, 10 ft, or any custom lengths on request. Extensions, saddles, and custom profiles available for quote on your RFQ and drawing.
