

DEECO METALS JUST-IN-TIME (JIT) ORDER POLICY

At DEECO Metals, we are proud to offer Just-In-Time (JIT) inventory solutions to support the evolving needs of our customers. Leveraging our extensive importing expertise, expansive warehousing space, and advanced handling capabilities, we are well-positioned to securely manage and deliver your products with precision and efficiency.

Our JIT program allows you to take advantage of **fixed offshore pricing** while avoiding the extended lead times and complex administrative processes typically associated with international procurement.

Once your JIT program is established, delivery lead times range from **one to several business days**, depending on your proximity to our Travelers Rest, South Carolina warehouse.

Participation Requirements:

1. A **30% down payment** is required at the time the order is placed.
2. All inventory must be **shipped within 180 days** of DEECO Metals receiving the product.

We are committed to delivering strategic supply chain solutions and look forward to becoming a trusted partner in your operations.
