

Standard Stainless Steel Elevator Sills

304 stainless steel profiles for cab/car, landing, hatch, and hoistway sills

Built for elevator entrances and modernization projects

DEECO Metals supplies custom extruded stainless steel elevator cab, car, hatch, landing, and hoistway sills. Standard sill profiles support standard elevator sill requirements. Custom configuration shapes available per customer drawings when required.

Advantages

- 304 stainless steel for strength, appearance and corrosion resistance (316L available on request)
- Extruded profiles help reduce machining time from solid bar stock
- Available for single speed and double speed cab and hatch applications along with 4" extension
- Standard 8 ft lengths with additional lengths or custom sizes on request
- Cutting services, sanding, trash holes and threaded countersinks on request

Other Alloys Available

- 1018 Carbon Steel Elevator Sills available as a cast iron replacement
- 316L Stainless Steel Elevator Sills quoted case by case due to the difficulty of extruding this grade

Standard Profile Summary

Type	Part No.	Lbs/Ft
Single Speed Cab	#75324	3.7
Double Speed Cab	#75325	6.7
Single Speed Hatch	#75225	4.9
Double Speed Hatch	#75226	7.5
Extension	#75423	3.09

Materials and lengths

Material: 304 stainless steel. Standard stock length: 8 ft. DEECO can supply 7 ft, 10 ft, and custom lengths on request. Extensions, saddles, and custom profiles available on your RFQ and drawing.

Common Applications

Cab and car sills

Hatch / Landing / Hoistway sills

Elevator thresholds

Extensions and saddles

Modernization projects

Custom elevator components

RFQ checklist

Please include the profile number, required metal, length, quantity, surface finish requirements, machining requirements, and requested delivery date.
